## **DETAILED ACTION**

### ***Specification***

The substitute specification submitted 6/27/2007 is accepted and should be entered. Applicant did not specifically state that no new matter has been added to the substitute specification. Examiner has reviewed the changes and confirms that no new matter has been added.

### ***Allowable Subject Matter***

1. Claims 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: claims 1-30 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01, In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claim 1.
3. Reference DE 10049826 A1 describes a manufacturing process as well as a computer-controlled printing method for extruded plastic objects.
4. Reference DE 2613411 C2 shows the production of thermoplastic extrusion profiles as well as direct printing and imprinting methods.
5. Reference DE 19823195 A1 discloses a production and digital printing method, as well as a device for printing on plastic surfaces.

Art Unit: 2125

6. Finally, U.S. Patent Publication 20030040974 shows the ability for a consumer to place a printing order and to select the service provider based on a number of entered criteria.

7. While the above cited references show the process of transmitting a design in an electronic format for thermoplastic extrusion, neither this reference taken alone or in combination with the prior art of record disclose the concept of electronically determining in the optical neuro-fuzzy structured computer/design image data bank parameters for basic materials supplied by a material supply facility and the associated and specifically named parameters as given in independent claim 1.

8. . It is this optical neuro-fuzzy structured computer/design image bank and associated parameters for each process, in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
